SUSTAINABLE CLEANING PROGRAM BY deLuna ECO

1

SUSTAINABLE CLEANING

We are committed to reducing our environmental impact and invite you to join us in this effort during your stay. You can schedule the cleaning service, preferably before 6:00 PM the day before, through the QR code you will find in your apartment. In case you do not require it, we will respect your privacy and will not enter your apartment unless your stay exceeds 3 days.

ECO-FRIENDLY CLEANING KIT

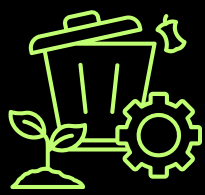

Instead of conventional chemical products, we offer an eco-friendly cleaning kit that uses environmentally friendly solutions, creating a healthier and more sustainable environment.

2

3

ECOLOGICAL AMENITIES

We have selected our amenities with sustainability in mind, using packaging and products that respect the environment, so you can enjoy conscious personal care.

EFFICIENT WASTE MANAGEMENT

We work diligently to minimize our waste production and ensure responsible disposal, contributing to a cleaner and healthier environment.

4

5

REDUCTION OF WATER CONSUMPTION

We are committed to water conservation and have implemented practices to reduce its consumption, thereby decreasing your ecological footprint.

ENERGY CONSUMPTION REDUCTION

We contribute to energy savings and hotel sustainability by reducing electricity consumption through decreased use of vacuums, lights, and adjusting laundry frequency. Additionally, we use renewable energy sources.
