

ON THE COSTA DAURADA and TERRES DE L'EBRE THERE ARE NO WATER RESTRICTIONS

According to the Catalan Water Agency - the public company in charge of water planning and management in Catalonia, belonging to the Department of Climate Action, Food and Rural Agenda of the Generalitat de Catalunya (Catalan Government), there are currently NO restrictions on the use of water on the Costa Daurada and Terres de l'Ebre. The only measure implemented is more intense monitoring of the status of water reserves and information and awareness-raising actions to promote water-saving.

Obviously, the FEHT, all the associations and companies that are part of it, ask all visitors to **use water responsibly** during their stay as tourists. We should all contribute to saving water.
